

WHO WE ARE

Phoenix Operations Group is an engineering services company that develops software analytics to protect US Warfighters and advance US Intelligence efforts. While our primary customers are DoD organizations, we also specialize in inter-agency functionality that bridges federal, military, and commercial efforts.

CORE COMPETENCIES

**ARTIFICIAL
INTELLIGENCE &
MACHINE LEARNING**

OUR PARTNERS

OUR CAPABILITIES

Phoenix believes in Arming the Analyst (user) with capabilities that reduce response time and improve accuracy within mission-critical environments. When we pair engineers with mission experts, often sitting together in mission environments, they can focus on building critical capabilities that provide immediate benefit to analysts and warfighters.
